TRADITIONS OF STRENGTH

Independence Day reminds us that America grew strong through Freedom. Not just freedom from foreign rule, but freedom at home, too. Freedom for our people to use their labors, ingenuity and enterprise to improve and increase our production for world peace, prosperity and a better standard of living.

We must not surrender this freedom to socialist planners. Labor and business enterprise working together under America's free economy will continue to keep America strong.

POWER for Florida's Future

Florida is America's fastest growing state. Engineers estimate that we'll have to triple our present power supply by 1962... even though we've already more than doubled it since V-J Day. In the American tradition of strength, we are prepared to meet that challenge... to supply the vital power for Florida's contributions to our nation's defense — for the growth and prosperity of our great state.

Do you have Series E Defense Bonds coming due this year?

Here's a money-earning opportunity for you

Now—a new law lets your maturing Series E Bonds go on earning for you ten years longer! And you don't have to do a thing!

ARE YOU one of those patriotic citizens who began buying—and holding—Series E Bonds ten years ago? Now your government is going to reward your faith with a chance for your bonds to earn extra money—over and above what you'd expected!

According to the bill passed by Congress last spring, it is now possible for your United States Series E Bonds to continue earning interest ten years longer than was originally planned.

Therefore, if you started an automatic bond saving plan, and helped your country at the same time, you can look forward to ten years more of effortless earning from the bonds you bought!

For example, a Series E Bond which cost you \$18.75 in 1942 will pay you \$25 in 1962. But

if you hold that bond ten extra years, until 1962, it will pay you \$33.33, an average interest of 2.9%.

And there is nothing for you, as a bond holder, to do. You need not exchange the bonds you have. You need not sign any paper, fill out any form. You simply keep your bonds as you have been keeping them.

You may still redeem any Series E Bond at any time after you've owned it for sixty days. (The tables on this page show what you can get for it.) But, unless you really need the cash you're much better off to hold your bonds; they are a paying method of saving. Bonds are safer than cash! Cash is too easily spent on nonessential things. And if you lose or accidentally destroy it, you're out that much money. But when you have cash in Defense Bonds, you're more apt

to hold on to it. And if your bonds are lost or destroyed, the Treasury will replace them for you at no cost or loss to you.

The cash you have in bond savings is safe and solid; and it's steadily growing toward a sum big enough to buy something really worth while when the proper time comes—a home, a business, a retirement fund, an education for your children.

So if you have bonds coming due, take advantage of this new offer of your government—just sit back and let them go on making money. Meanwhile keep adding to your savings by buying more United States Defense Bonds regularly—through the Payroll Savings Plan where you work or the Bond-A-Month Plan where you bank.

If you want to be paid your interest as current income—

The new law also allows you to exchange your Series E Bonds, in blocks of \$500 or more, for Special Series G Bonds which pay interest semiannually at the rate of 2½% per year. For full details, ask at any Federal Reserve Bank or Branch.

Here's how Series E Defense Bonds earn the first 10 years

Modern Roads Are Difficult Problem

BOCA RATON — Speaking before a group of business and professional leaders, Fyke Johnson, president of the American Safety Foundation, termed road modernization the most difficult problem confronting highway transportation in America today.

He pointed out that during the next decade about half of our existing main roads will wear out; many of them are already obsolete.

Traffic, he explained, concentrates on a relatively small mileage of highways; 86 per cent of rural travel for example, occurs on less than a fourth of our road mileage.

That is why we should establish a long term over-all road building program designed to insure construction of permanent main arteries on a statewide basis.

A striking measure of the problem is the fact that the mileage of highways improved during the last two years would not accommodate, bumper-to-bumper in a single lane, the new motor vehicles that rolled off the assembly line during the same period.

Man's individual independence and freedom from all forms of tyranny come as he spiritually perceives God and His perfect creation, including man. This is the theme of all Christian Science services next Sunday when the subject of the Lesson is "GOD".

The Golden Text is from Revelation (21: 3): "Behold, the tabernacle of God is with men, and he will dwell with them, and they shall be his people, and God himself shall be with them, and be their God."

Bible passages include the following from Psalms (119: 45): "I will walk at liberty: for I seek thy precepts."

Correlative selections from "Science and Health with Key to the Scriptures" by Mary Baker Eddy include: "Like our nation, Christian Science has its Declaration of Independence. God has endowed man with inalienable rights, among which are self-government, reason, and conscience. Man is properly self-governed only when he is guided rightly and governed by his Maker, divine Truth and Love" (p. 106).
